EC2-Ubuntu to Windows Server Connection

Step 1: Create windows server 2019 AMI instance and keep the key pair handy

Step2: Install Remmina (https://remmina.org/) for accessing .rdp file (REMOTE DESKTOP PROTOCOL) during a windows server connect

    sudo apt-add-repository ppa:remmina-ppa-team/remmina-next
    sudo apt-get update
     sudo apt install remmina remmina-plugin-rdp remmina-plugin-secret remmina-plugin-spice

Steps3: Go to Windows AMI instance and connect using **.rdp** file.

Step4 (optional): After achieving windows server and completed the required task kill/exist all Remmina Process
        sudo killall remmina or *Reboot your ubuntu system*
